

WORK EXPERIENCE

The Predictive Index

2020 - 2025

Senior Software Engineer

- Built and maintained full-stack features across PI's core platforms and the Perform product using Angular, React, Ruby on Rails, and C#/NET APIs deployed on Azure microservices with CI/CD pipelines.
- Pioneered and led the development of the PI Meeting Notetaker in Perform. This AI-driven feature automatically summarizes virtual meetings. In addition to writing the code, I aligned stakeholders across product, design, and engineering to bring one of PI's first customer-facing AI features from concept to production.
- Designed and implemented the personalized demo experience and seller tools platform, enabling PI's partners and direct sales team to generate sandbox environments, improving sales efficiency and lead conversion.

Museum of Science, Boston

2018 - 2020

Web & Mobile Application Developer

- Supported and enhanced over 1,000 web pages serving more than 7 million unique visitors each year. Ensured responsive, accessible, and SEO-optimized experiences across desktop and mobile..
- Integrated the Tessitura ticketing platform into the museum's Angular web applications and kiosks, creating a more seamless ticketing and membership experience for visitors.

ENTREPRENEURSHIP

QuickTix

2014 - 2021

CEO & Co-founder

- Built and scaled a ticketing platform serving small theaters, driving over \$100,000 in revenue through secure AWS-based infrastructure and Stripe payments, while managing a lean, fast-moving team.

FriendlyU

2014 - 2019

CTO & Co-founder

- Architected and led development of a web and iPhone app that facilitated thousands of student conversations, deploying scalable infrastructure on AWS (RDS, EC2) and managing a cross-functional team of developers and designers.
